DETAILED ACTION

Drawings

1. Figure 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

and said fuel is supplied toward a fuel injection valve arranged so as to face to the engine through a motor portion arranged within the electric pump, wherein said high pressure electric pump is provided with a pump portion and a motor portion within a pump housing, said motor portion is formed as a brush less motor portion, and the outer periphery (stator) of a drive coil (armature) in the brush less motor portion fixedly arranged within the pump housing is molded with a resin material.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show brush fewer motors.
